HIGH GAIN, STEERABLE MULTIPLE BEAM ANTENNA SYSTEM

CROSS REFERENCE TO RELATED PATENT APPLICATION

This application is a continuation-in-part application of United States Patent Application No. 10/673,033 filed September 27, 2003, now ~~pending~~ *abandon*, which is incorporated by reference herein.

BACKGROUND OF THE INVENTION

In wireless communications efficient communications can be greatly facilitated by much improved and novel antenna systems. Thus, there is a long standing need in the wireless communications and antenna art for antennas that can provide high-gain, antennas that provide for multi-beams, and antennas that can provide 360 degree radiation.
